

## **RTAC LEGISLATIVE UPDATE**

**April 21, 2009**

Due to the drastic decline in highway revenues, ADOT has indicated that significant reductions in projects will likely occur when the agency updates its five year construction program. Modifications are also highly likely for the current year.

The attached presentation was provided to the State Transportation Board at their meeting on Friday. The recommendations indicate that no new projects will be initiated in rural Arizona in 2014 and that many projects scheduled for funding in earlier years will either encounter significant delays or will no longer be funded.

The specific proposed project adjustments can be found in the presentation.
